

The CareerSync User Manual

Your guide to mapping skills, closing gaps and landing the right internship or job.

STUDENT · FACULTY · TPO · INDUSTRY · ADMIN

WELCOME

One place for colleges, students and companies.

Many students finish a degree without knowing which skills employers actually want, and many companies struggle to find people with the right mix of skills. CareerSync closes that gap.

It compares what a student knows with what a role requires, then suggests courses, projects, internships and jobs that fit. Colleges see where their students stand, and companies reach candidates by skill instead of waiting for applications.

INSIDE THIS MANUAL

1	Welcome & contents	p. 1
2	Getting started	p. 2
3	The student guide	p. 3
4	Faculty, TPO, industry & admin	p. 4
5	Tips, privacy & help	p. 5

SECTION 2

Getting started

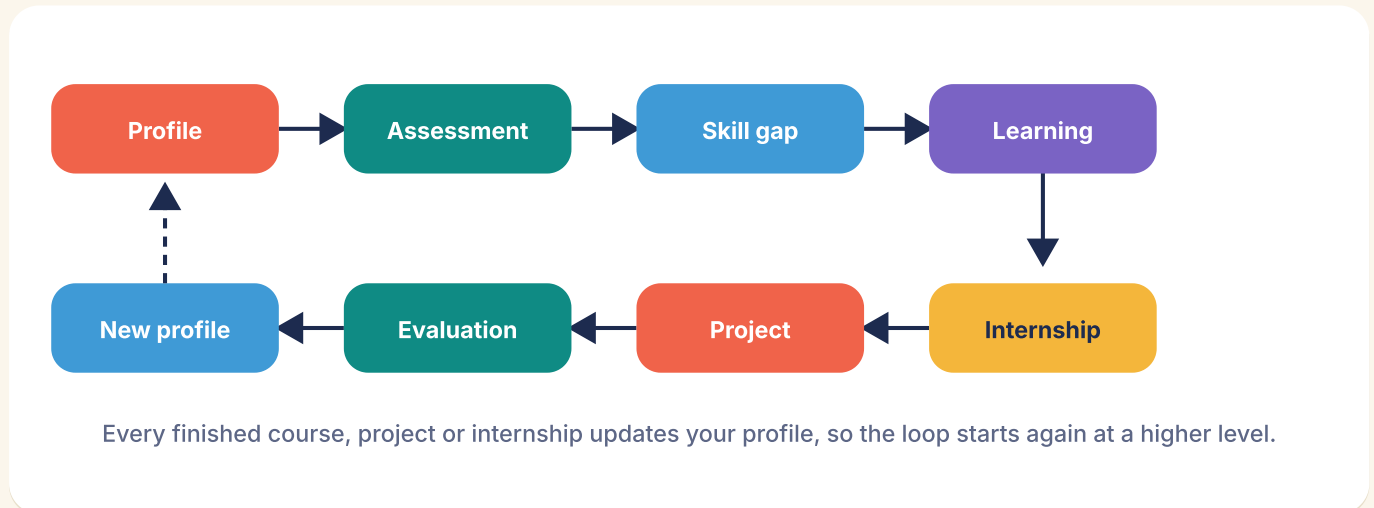

Four steps take you from sign-up to your first set of recommendations. It takes about fifteen minutes if you have your resume handy.

WHICH ROLE ARE YOU?

HOW THE WHOLE JOURNEY CONNECTS

Good to know. Your first sign-in works before verification, but applying to opportunities and being visible to recruiters unlock once your account is verified.

SECTION 3

The student guide

Everything you need to go from "what am I missing?" to a confirmed offer.

Skill gap analysis

Pick a target role. CareerSync compares it with your verified skills and lists what is missing.

Target role: Software Developer

Skill	Status
Java	You have it
SQL	You have it
Git	You have it
Spring Boot	Gap
REST API	Gap

Your gap: **Spring Boot + REST API.**

Learning Hub

For every gap you get suggested courses, certifications, workshops, projects, labs, practice tests, bootcamps and faculty mentoring. Finish one and your profile updates.

Match score

Shown on each internship. It blends your skills, academics, interests and eligibility. It is an indicator, **not a promise** of selection.

FINDING AND APPLYING FOR INTERNSHIPS AND JOBS

Search the Internship Portal or Placement Portal and filter by domain, skills, location, work mode, duration, stipend, branch, graduation year or CGPA.

Open a listing to check eligibility, then apply and upload any documents it asks for. You will receive a notification each time the status changes.

Teams: in the Project Hub you can apply for company problem statements alone or with a team.

Resume builder

One click turns your profile into a clean resume: education, skills, projects, certifications, internships and achievements. Upload an existing resume and the AI reads the skills out of it for you.

READING YOUR APPLICATION STATUS

Keep your profile alive. After each course, project, internship or certificate, add it. A fresher profile gives sharper matches and better recommendations.

SECTION 4

Faculty, TPO, industry & admin

Each role gets its own dashboard. Here is what you can do with it.

Faculty & mentors

- See student skill levels, gaps and placement readiness
- Assign mentees, give feedback and run reviews
- Recommend activities and track projects
- Create workshops, bootcamps, hackathons and industry sessions, and enrol students by skill gap

Class skill snapshot

Skill	Students	Average
Python	85	Intermediate
Java	64	Intermediate
SQL	91	Advanced
Cloud	32	Beginner

TPO / college

- Placement dashboard: eligible students, applications, internships, offers, company participation
- Verify companies, approve opportunities, schedule interviews and drives
- Analytics by branch, skill, company and year, plus internship conversion
- **Skill Readiness Index:** one score per department built from assessments, skills, projects, certifications and internships

Privacy first. Analytics are shown in aggregate wherever possible, so individual students are not exposed without need.

Industry & recruiters

- Register a company profile (it is verified before going live)
- Define the skills and levels each role needs
- Post internships, jobs and real-world project problems
- Search talent by skill, branch, certification and projects, within student consent
- Offer mentors, guest lectures, visits and give feedback on students

Example: Python + SQL + Power BI finds **47** eligible candidates. You review them and run your own selection.

Admin

- Verify students, faculty, institutions, companies and recruiters
- Moderate internships, jobs, courses, training and project proposals
- Create reports by college, department, industry partner, skill demand and placement trend

Admins keep the platform trustworthy. If a listing looks wrong, it can be reviewed and removed here.

WORKING TOGETHER: ACADEMIA + INDUSTRY

From a company's problem to a validated student project

Industry problem

College

Student project

Industry validation

Companies can also partner with colleges for training, workshops, guest lectures, industrial visits, recruitment drives and curriculum feedback. When demand for a skill such as cloud computing rises while student proficiency stays low, the college sees it and can plan training around it.

Tips, privacy & help

A few habits that get you better results, and answers to common questions.

What employers are asking for

Colleges see demand trends like this, which helps them plan training and electives.

Illustrative chart. Live figures come from companies' posted requirements.

Five habits that pay off

1. Complete every profile section. Matches depend on it.
2. Retake assessments after you learn something new.
3. Start with the gap the Learning Hub ranks first.
4. Add projects with a short description of your own role.
5. Check notifications daily during application season.

YOUR DATA AND PRIVACY

- Recruiters see your details only as far as your consent and your institution's policy allow.
- Reports shared with colleges and companies use aggregate figures wherever possible.
- Every account is verified, and listings are moderated, so you deal with real people and real opportunities.
- Keep your password private and sign out on shared computers.

QUICK FIXES

I can't apply to an internship.

Check that your account is verified and that you meet the eligibility shown on the listing.

My skills look wrong.

Retake the assessment, or upload a newer resume so skills are re-read.

No recommendations yet.

Choose a target role in your profile. Gaps are measured against it.

COMMON QUESTIONS

Is a high match score a guarantee?

No. It shows how well your profile fits a listing. Companies make the final choice.

Can I use CareerSync before I have skills?

Yes. Start with assessments and the Learning Hub, which build your first skill profile.

Who sees my assessment results?

You, your mentors and your institution. Recruiters see your details only within your consent.

Can companies post projects?

Yes. Faculty can give them to student teams, capstones or hackathons.

Still stuck? We're here.

Open the Help option in your CareerSync dashboard to reach support.
